grout cleaner

extremely powerful

500 ml e

HG grout cleaner

- extremely powerful
- restores the colour of the grout
- ready to use

HG grout cleaner is a powerful and 'buffered' retaining agent. These properties ensure that it retains the same powerful effect during soaking and brushing, which produces a fantastic result. This product can be used on nearly all types of grout between wall tiles, floor tiles and brick.

Directions for use: Remove the locking clip before use. Press the nozzle at the front side and turn a quarter. Spray the grout thoroughly, leave the product to work for a few minutes and then brush the grout with a brush. Finally wipe off the loose dirt with clean lukewarm water and leave to dry. Repeat the treatment if necessary. Turn the nozzle a quarter backwards after use (blocking position). Grout in shower cubicles and bathrooms is often dirty because of scale. In that case you should use *HG limescale remover*. For black deposits on grout (mould), please use *HG mould spray*.

Attention: Transport and store the bottle upright.

Not suitable for grout treated with **gloss paint**: not suitable for grout between calciferous tiles (marble etc.). Use *HG natural stone bathroom cleaner* for those. Silicon joints will not always produce an optimum result.
