HG eliminator of all unpleasant smells at source

HG "eliminator of all unpleasant smells at source" has been specially developed to remove unpleasant smells biologically. Does not mask the smell but removes it at source by means of natural enzymes and microbes. Amongst other things, it removes smells caused by urine, excrement, vomit, pets, nicotine, fruit, vegetables and many other sources.

Directions for use: First remove any remains (e.g. where someone has been sick, clean vomit, in the case of a stinking rubbish bin, first empty it).

1. Turn the nozzle on the front side a quarter.
2. Spray HG "eliminator of all unpleasant smells at source" amply on the surface to be cleaned. It is important that the product be sprayed on the source of the smell to remove the bad smell completely.
3. Depending on the porosity, the source of the smell will disappear between 20 minutes and a few hours. On non-porous surfaces, this will be 20 minutes. On extremely porous surfaces this will be a few hours.
4. The smell will have disappeared when the treated surface is dry. Repeat if necessary.
5. Turn the nozzle a quarter after use (OFF).

Attention: Transport and store the bottle upright. Before use on carpets and rugs, test for colour fastness on an inconspicuous area. Do not use on food or drink. Keep in frostfree area. **P101-** if medical advice is needed, have product container or label at hand. **P102-** Keep out of reach of children. • Medical personnel can request the data sheet via +31 (0)36 54 94 777 • The consumer's information sheet can be obtained via www.HG.eu
