500 ml e

HG natural stone kitchen top cleaner

- for the safe daily cleaning of granite, marble, hard stone and other natural stone kitchen tops.
- cleans without leaving stripes, no rubbing required!

HG "natural stone kitchen top cleaner" has been especially developed for the fast and safe daily cleaning of natural stone kitchen tops. This product effectively removes fat and other grime and leaves a stripe-free result, without rubbing. This special formula also enhances the texture so that your kitchen top's "natural" properties are as good as new every day.

Directions for use: Turn the nozzle on the front side a quarter. Spray the surface to be cleaned with HG "natural stone kitchen top cleaner" and wipe the surface with a clean cloth (can be dampened). For stubborn, dried-in grime leave the product to penetrate for a few minutes (if necessary, use an HG "kitchen sponge" to loosen the grime). For extra gloss, we recommend polishing the treated surface with a dry cloth or tea towel afterwards. Turn the nozzle a quarter after use (OFF).

TIP: This product is also suitable for concrete worktops. To protect your kitchen top against the penetration of fat, grime and stains we recommend the application of HG "top-protector".

Attention: Transport and store the bottle upright. Do not spray directly onto foods. Do not use scouring agents on your kitchen top as that could leave mat and tarnished areas. • Medical personnel can request the data sheet via +31 (0)36 54 94 777 • The consumer's information sheet can be obtained via www.HG.eu
